

# Pneumatic FRL

## Filters

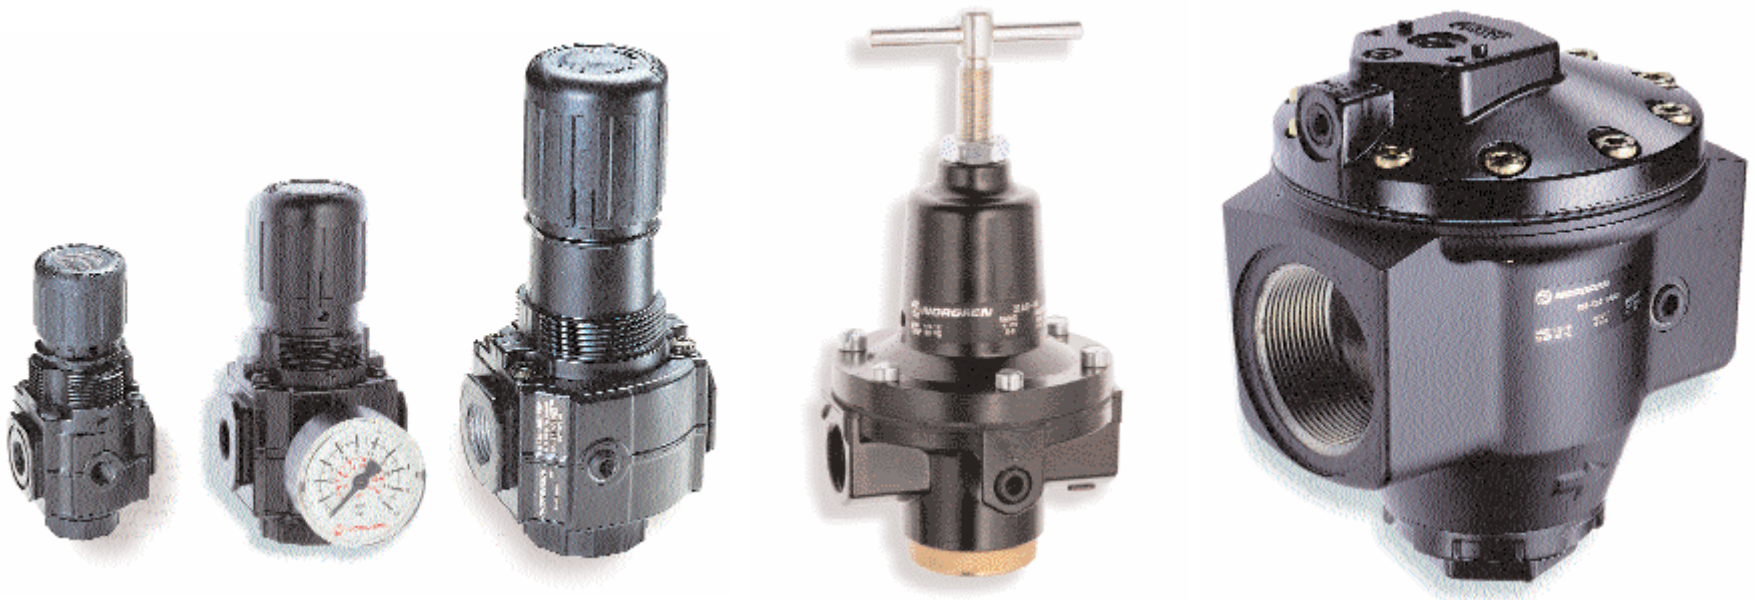

Various grades of filters exist to remove condensate, dirt, oil, oil vapour and most hydrocarbon odours. Port sizes are available from 1/8 BSP up to 2" BSP. Manual and Automatic Drain options are also available.

## Pressure Regulators

Pressure regulators reduce pressure to a level that is required by the application. Port sizes are available from 1/8 BSP up to 2" BSP. Pressure Gauges are also available.

## Lubricators

Lubricators distribute oil into the compressed air line. This can significantly increase the life of downstream equipment such as valves and actuators. Port sizes are available from 1/8 BSP up to 2" BSP.

## Filter-Regulators

Dual function products that reduce air pressure to an adjustable level after removing water, dirt and dust. Port sizes are available from 1/8 BSP up to 1 1/2" BSP. Manual and Automatic Drain options are also available.

## Multi-Product Combinations and Boxed Sets

Popular multi-product combinations featuring Boxed Sets - these assemblies comprise shut-off valve, filter-regulator, lubricator, gauge and wall brackets. Port sizes are available from 1/8 BSP up to 1 1/2" BSP. Manual and Automatic Drain options are also available.

## Pressure Gauges

A comprehensive range of gauges featuring triple calibrated faces - bar, psi and MPa (megapascals).

## Air Dryers

Our 'point of use' membrane air dryers remove water vapour. They are ideal for applications demanding moisture free air, for example inkjet print heads and air bearings.

## Ported Stainless Steel Filters, Regulators, Lubricators & Filter-Regulators

Miniature high corrosion resistant design. Particularly suitable for marine, petro-chemical, food processing, medical dental and similar applications.

## Ported Precision Regulators

Cost effective solutions if you need precise pressure control. Ideal for air gauging, instrumentation and laboratory use.
